

Plants That Attract Hummingbirds

Hummingbirds are pollinators, and pollinators are a vital part of our ecosystem because they help crops and other plants grow. One out of every three bites of food that you eat were brought to you with the help of pollinators. Pollinator populations are declining due to the use of pesticides and habitat destruction. It's important to do our part to assist them by planting beneficial plants in our gardens. These plants attract hummingbirds because of the nectar they provide. Include these in your garden beds to give our pollinator friends a helping hand.

Annuals That Attract Hummingbirds

Bougainvillea	Impatiens	Pentas
Dahlias	Lantana	Petunias
Fuchsia	Nicotiana (Flowering Tobacco)	Salvia
